Slat Wall Climb Triple Threat

MRCF-SLAT

Shipping Weight: lbs

Shipping Dimensions: "L X "W X "H

Brand: Natural Playgrounds Company

Toxicity: child friendly wood preservative

Age Appropriateness: all ages

Similar to the Vertical Wall Climb, but more challenging because of the rapid sequence climbing, the Slat Wall Triple Threat allows toe and finger holds using the spaces between the slats so that climbing and slightly assisted on the middle climb, but the shorter climbs on either end are closed boards requiring a vertical leap and a scramble over the top.

Price is for 2-4' high x 8' wide walls and 1-8' high x 8' wide walls. "A frame" supports for above ground installation.

Put this in a bed of mud, and you have a fabulous challenge element as the boards get more and more slippery.

This element can be sized for any age group, And some of our clients have built small and large ones side by side so that everyone in the family can be doing the same thing.

Comes as a kit that can be installed permanently or as a temporary item. Complete installations instructions are included.

For schools and public playgrounds, a fall zone would be required.
