## Giant Ladder

**MRCF-GL**

**Shipping Weight: lbs**

**Shipping Dimensions: "L X "W X "H**

**Brand: Natural**

**Toxicity: child friendly wood preservative**

**Age Appropriateness: all ages**

As you can see from the photos, the Giant Ladder is designed to be a little scary and very challenging. People with height issues might find this a particularly interesting element. :-)

Shown here, the ladder is 16 feet, which we can make, but our standard offer is the 8' tall one that's perfect for middle and high school students.

The ladder "rails" are spaced about 25 inches apart, and the whole structure is 5' wide.

Comes as a kit that can be installed permanently, or we can make it free standing for temporary installation if you order the A-frame supports. Complete installation instructions are included.

For schools and public playgrounds, an 8' high model is the highest recommended and a 12" deep fall zone, 6' all around would be required.
