Demonstration Table

teach

Shipping Weight: 120 lbs

Shipping Dimensions: 96"L X 28"W X 10"H

Brand: Natural Playgrounds Company

Toxicity: child friendly wood preservative

Age Appropriateness: all ages

The Demonstration/Work Table is an excellent Natural Playground element for outdoor classroom, because it can be used for demonstrations to show children different concepts, materials, experiments, and so on, and kids can use it for building models, collecting things, or etc.

The height of the table can be easily adjusted if you let us know the age groups who will be using it; we've made these for adults to be "in front of the class," and for children to use on their own.

It's big enough at 8' long x 27" wide that a number of children can be around it at any one time, and small and light enough that it can be easily moved to wherever you need it.

These are also great for an outdoor classroom, and can easily be installed in front of sitting stumps or slab or other benches spaced 6 safe feet apart.

NOTE: this image shows the Demo Table with a sink and gooseneck faucet, which are obviously options, but they DO NOT come with the basic table.

These tables are so inexpensive that you can easily buy several to make a real working outdoor classroom where lots of experiential learning can take place.

If you want kids to be able to sit, get some of our sitting stumps to go along with the table! (see elsewhere in this store)
