Whiteboard Walls

NMS-CW

Shipping Weight: 225 lbs
Shipping Dimensions: 100"L X 55"W X 10"H
Brand: Natural Playgrounds Company
Toxicity: treated with child friendly wood preservative
Age Appropriateness: all ages

The Whiteboard Wall is a large surface (4' x 6' or 8') which is made for dry erase markers or finger paints!

These Whiteboards are great for outdoor classrooms, and can easily be installed in front of sitting stumps or slab or other benches spaced 6 safe feet apart.

They can be mounted at any height for any age group; the top/or highest part can be the teacher's writing section, while the lower part can be used by students to try out math problems, spelling, printing, or etc.

These are great for art, too. 33% of children are visual learners, and children who make art read better and get better grades, so art should be an important activity outside as well, because the outdoor environment stimulates all kinds of sensations that children can't get inside.

It's well-known that art develops hand and eye coordination, stimulates perception, allows exploration of ideas, encourages creative solutions, enhances critical thinking, provides a way to reflect on feelings, and allows children to be more self-aware and to express thoughts or emotions in new ways, so this Whiteboard Wall can play a critical role in your outdoor curriculum.

Whiteboard Panels are completely washable, which makes cleanup simple.

Made for mounting to a wall or fence, but it can also be freestanding, and it comes with complete, easy installation instructions and all hardware.

NOTE: elsewhere in the store is our regular, freestanding art easel which measures 2 feet wide by 4 feet tall, and comes complete with a small shelf at the bottom. If you're looking for something smaller than our large whiteboard wall, please look at the Art Easel with whiteboard panel.
